3. Parties to the proposed transaction

The applicant: A resident company

4. Description of the proposed transaction

The applicant proposes to enter into trades in respect of bonds issued by the Brazilian government (bonds).

The applicant will –

- enter into a purchase and resell agreement with international counterparties in terms of which it will acquire bonds from the counterparties and will agree to sell back the bonds to the counterparties on specified dates and for specified prices which will each include an interest component; and

- acquire bonds in the market without any associated resell arrangements.

The applicant may in either case receive interest from the Brazilian government as issuer of the bonds during the term of the transaction.

The interest that the applicant will receive is not subject to tax in Brazil.

In respect of the purchase and resell agreement, the applicant will pay the counterparties so-called manufactured payments calculated with reference to the interest it will receive while holding each bond.

The applicant will recognise the purchase and resell agreements and the bonds at fair value in profit or loss in terms of International Financial Reporting Standard 9, and section 24JB(2) will apply to the instruments.

5. Conditions and assumptions
